For safety, gate/pickets/flower boxes and rounds need a rail on top. 1/4 round does not need a ground line, it is its own ground line. The width of the fence (front to back) needs to be measured including the ground line to be sure the fence is not wider than it is tall-this also applies when measuring oxer if the ground line is not placed directly under the front poles.

Warm up fences will be fence #5, jumping in the same direction as the course and fence #1 jumping in the opposite direction as the course.

The ground line will need to be changed on fence #1 between the warm up and exhibition.

Taking any other fences during the warm up will be a disqualification for unsportsmanlike conduct.

All fences should be 10-12 feet wide, unless otherwise specified

The 66' line should be set exactly, other measurements can be approximate within +/- 6".
